PROFESSIONAL EXPERIENCE

Alignerr

01/2026 – 07/2026

AI Model Evaluator

- Evaluated and compared state of the art **Claude** models on the Taiga platform, identifying inconsistencies, reasoning errors, and other model behavior issues.
- Produced detailed, evidence based rationales to document evaluation findings and support improvements in model quality, reliability and alignment.

Orange Mind

06/2026 – Present

Application Developer Intern

- Served as the primary front end developer for Orange Mind, an early stage startup product, building the mobile application using React Native.
- Developed and maintained cross platform features to ensure reliable functionality and a consistent user experience across Android and iOS.

EDUCATION

Adelaide University

07/2023 – 07/2026

Bachelor of Computer Science | Major in Cybersecurity

GPA: 6.08 / 7

PROJECTS

Data Analysis of Economic Growth and Environmental Health

07/2025 – 11/2025

- Analyzed global panel data from 2000-2020 across ~190 countries to study economic and environmental trends
- Applied non-linear fixed-effects econometric models to examine relationships between growth, PM2.5 pollution, and life expectancy
- Identified Environmental Kuznets Curve turning points and developed forecasts for pollution decline during economic transitions

Machine Learning Analysis of Video Game Markets

02/2024 – 07/2024

- Processed and analyzed 7,500+ video game records using data cleaning, preprocessing, and exploratory analysis
- Built and evaluated classification models including Random Forest, Logistic Regression, and Decision Trees
- Achieved 79% accuracy and 0.87 ROC AUC, identifying platform availability and user scores as key predictors

EXTRACURRICULAR ACTIVITIES

Adelaide University Competitive Programming League

04/2025 – 10/2025

Adelaide Competitive Programming Club

- Ranked **5th** place in Adelaide University Competitive Programming League.
- Solved a variety of difficult algorithmic problems while ensuring optimal program runtime.

SKILLS

Technical Skills: Python, C++, SQL, TypeScript, HTML/CSS, React Native, React, Machine Learning, Statistical Modeling, LLM Evaluation

Coursework: Data Structures and Algorithms, Machine Learning, Database Systems, Software Engineering
